Commander
US Army Corps of Engineers
Louisville District
P.O. Box 59
Attn: ORHOP-R\ Glen Bayes
Louisville, KY 40201

Dear Mr. Bayes:

Enclosed are the results of the 1989 gypsy moth monitoring program on 12 Corps of Engineer sites within the Louisville District. We are happy to report that all sites, excepting Mississinewa Lake, caught no male gypsy moths. Mississinewa Lake only caught one moth. One interesting and heartening note is that Salamonie Lake has failed to trap a moth since the eight moths trapped in 1987. Each site has received an individual report of the trapping results at that site.

Both Brookville and Patoka Lakes have, at their request, temporarily been dropped from the trapping program. As the gypsy moth wave front of infestation nears these lakes, we hope to begin trapping in this area again.

We thank you for your continued participation in this gypsy moth monitoring program. If you have any questions concerning these results or future gypsy moth activities at any of these sites, please contact us at 304-291-4133.

Sincerely,

William R. MacFarlane
